

CENTRAL INTELLIGENCE AGENCY
DECLASSIFIED DOCUMENT - ORIGINS
Exceptional Authorization: EO 13526 - OMEGA-PRIME
LEVEL

Partial Declassification Date : [REDACTED]
11/2020

DOSSIER NO: DRACO-ORIGIN-[REDACTED]

Subject: Origin of DRACO

Period Covered: Prehistory – Mesozoic
Era – Present

Classification : EXISTENTIAL HISTORICAL
THREAT

Access: STRICTLY PROHIBITED TO THE PUBLIC

EXECUTIVE SUMMARY

The discovery of anomolous cave paintings in [REDACTED] (restricted zone) indicates that humanity never imagined dragons. They were observed.

Cross-referenced analysies suggest that the extinction of dinosaurs (= 66 million years) is not exclusively due to a meteorite impact, but to a mass biological event involving a dominant species that is almost extinct today: DRACO.

CLASSIFIED ARCHAEOLOGICAL DISCOVERY

Site: deep cave, incasestible
without military equipment
no modern human presence
radiocarbon dating: -32,000 to -40,000 years
Contents of paintings: giant winged
creatures, scales, tails, flames,
family groups
prostrate human figures
Some paintings are superimposed on
fossilized dinosaur bones, major anomaly.

RE-EVALUATION OF DINOSAUR EXTINCTION

Official Version
-asteroid impact
-volcanism
-climate disruption
CIA Version (confidential)
-planetary dominance conflict
-DRACO vs reptilian megafauna
-release of planetary thermal energy.
-atmospheric ignition
The asteroid would be an agravating
factor, not the initial cause.
